

About Us

INNOVEN C.A. is a Venezuelan company specialized in integrated industrial services and the procurement of materials and equipment, with extensive experience in the oil, petrochemical and industrial sectors. We have a team of highly qualified engineers, technicians and specialists, backed by representation agreements with world-leading manufacturers.

We position ourselves as strategic allies of our clients, providing reliable and efficient technical solutions tailored to the operational requirements of each project. Our focus is to contribute directly to asset integrity, operational continuity and the sustainable economic benefit of our clients' operations.

Mission

At INNOVEN, we provide integrated solutions in civil, mechanical, electrical and instrumentation engineering, as well as project procurement, with a firm commitment to quality, continuous improvement and customer satisfaction. We act with technical and professional responsibility, adapting to the challenges of our environment to ensure reliable and efficient results.

Vision

To be recognized as a leading multidisciplinary engineering company in Venezuela, standing out for our operational excellence, adaptability and commitment to our clients, building long-term relationships of trust in every project we undertake.

Values

Quality

We strive to deliver products and services of the highest quality, exceeding our clients' expectations. We value learning and continuous improvement.

Teamwork

We foster an environment where cooperation is essential. We believe that together we achieve more, valuing each individual's contribution to reach our common goals.

Communication

We promote transparency in our communications, encouraging the respectful and constructive exchange of ideas and opinions, ensuring that every team member feels heard and valued.

Customer Satisfaction

We are dedicated to exceeding our clients' expectations by offering high-quality services and innovative solutions that create real value in their operations.

Adaptability

We are committed to constantly evolving to respond efficiently to market demands and changes, ensuring we offer up-to-date and competitive solutions.

Quality Policy

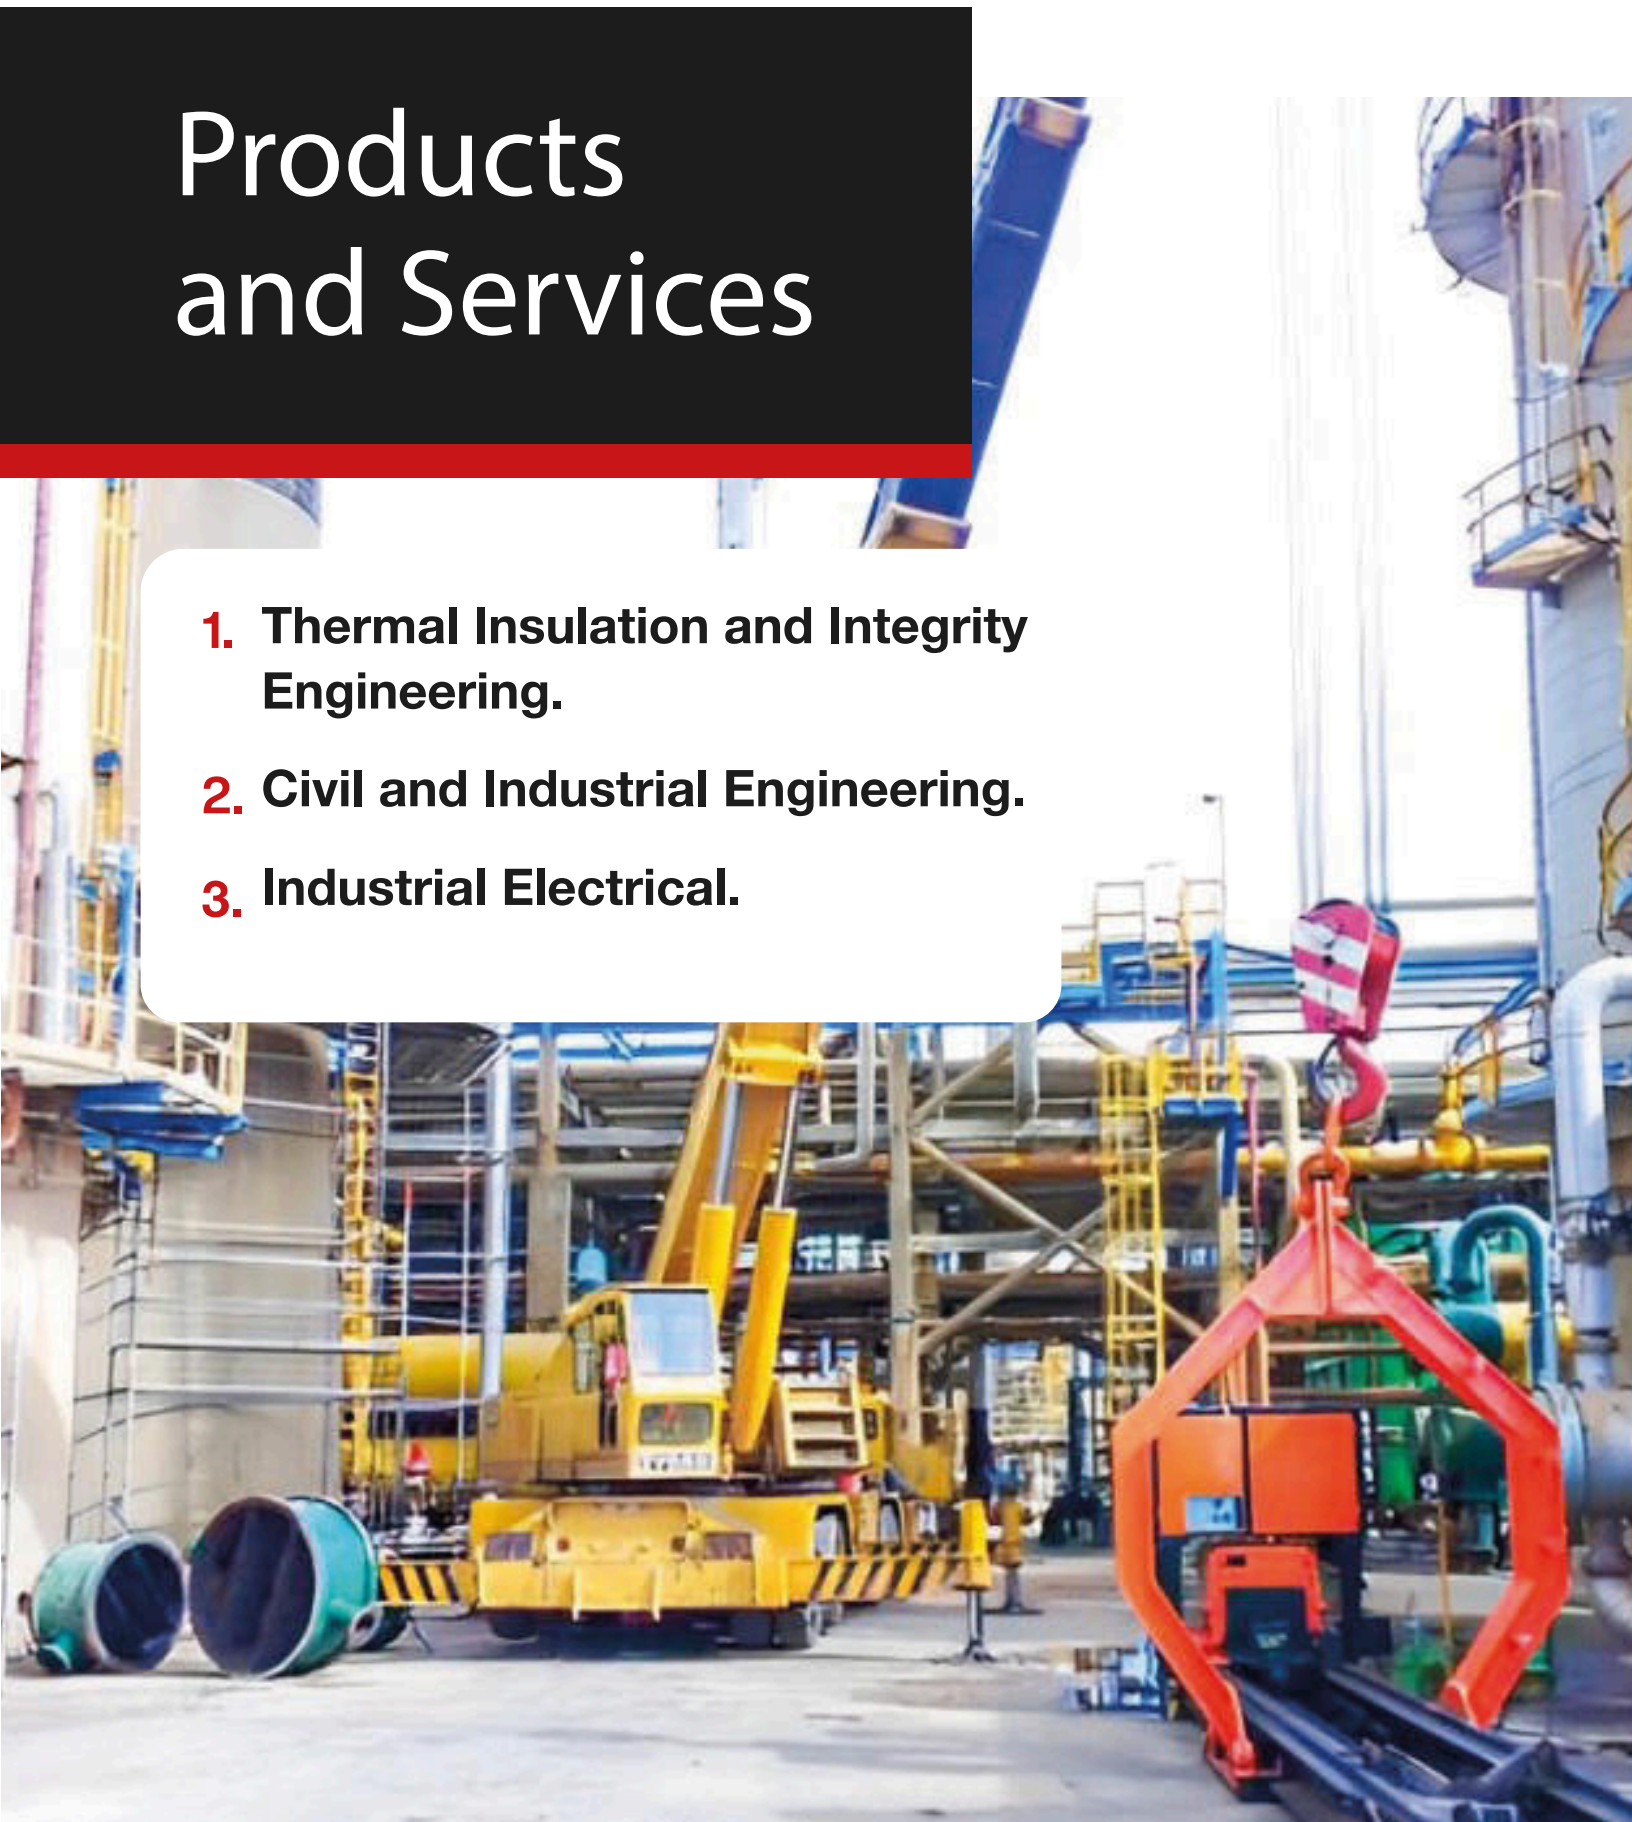

AT INNOVEN, a company dedicated to providing integrated solutions in engineering projects and procurement services, we are committed to fully meeting the requirements of our clients and stakeholders. We guarantee reliable results through efficient logistics and specialized technical advice at every phase of the project, ensuring strict compliance with all applicable legal, regulatory and contractual requirements.

We promote the continuous development of our people and an organizational culture based on integrity, respect and professional responsibility, driving innovation and the constant optimization of our processes through our Quality Management System (QMS), aimed at achieving international certification standards.

Products and Services

- 1. Thermal Insulation and Integrity Engineering.**
- 2. Civil and Industrial Engineering.**
- 3. Industrial Electrical.**

Thermal Insulation and Integrity Engineering.

Official representatives of Morgan Advanced Materials — Thermal Ceramics, a world-leading manufacturer of thermal insulation and refractory solutions, which positions us as a technical reference in this field for Venezuela's oil and petrochemical sector.

Our services in this area are focused on ensuring energy conservation, asset protection and the operational continuity of industrial plants and facilities.

Industrial Thermal Insulation

- ✓ Thermal insulation for heat conservation in piping and equipment, using materials such as fiberglass, calcium silicate, expanded perlite, mineral wool and ceramic fiber.
- ✓ Thermal insulation for cold conservation and cryogenic service, using materials such as Foam Glass, polyurethane, neoprene and expanded polystyrene.
- ✓ Acoustic insulation for noise control and reduction in control rooms and industrial equipment.

Refractory Systems

- ✓ Refractory application in furnaces, boilers and major equipment by bricklaying, casting, gunning, ramming and injection.
- ✓ Fire protection for steel structures and vessels (Fireproofing), by casting or spraying insulating and refractory mortar.

Industrial Refrigeration and Air Conditioning

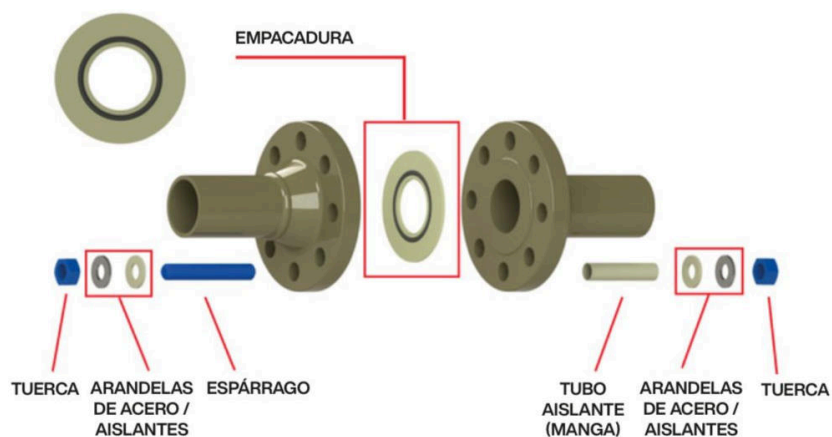

- ✓ Design and installation of comfort, precision and chilled-water air conditioning systems.
- ✓ Design and installation of galvanized sheet and polyurethane ductwork.
- ✓ Maintenance and supply of original equipment and spare parts.
- ✓ Specialized personnel available 24/7/365.

Gaskets and Industrial Sealing

- ✓ Gasket kits for flange isolation
- ✓ Spiral-wound gaskets for hot lines and pressure vessels
- ✓ Flexible graphite seals and type D (Ring Type Joint), type E (Flat Face) and type F (Raised Face) gaskets.

Civil and Industrial Engineering.

We carry out integrated civil and industrial engineering projects for the productive sector, with qualified personnel and our own equipment. This area brings together all our construction, structural intervention and surface protection capabilities, providing a complete offering for the maintenance and development of industrial facilities.

Civil Works

- ✓ Construction and remodeling of civil and industrial buildings.
- ✓ Earthworks and foundations.
- ✓ Pipe laying and waterproofing of roofs and terraces.
- ✓ Supply, rental, erection and dismantling of scaffolding.

Metalworking and Structures

- ✓ Fabrication and erection of steel structures.
- ✓ Structural and industrial welding (SMAW, MIG/MAG, TIG).
- ✓ Replacement and repair of steel plates and metal components.
- ✓ Rental of heavy, lifting and welding equipment.

Surface Treatment and Protection

- ✓ Surface preparation by sandblasting and shot blasting.
- ✓ Application of industrial and anti-corrosion paint systems.
- ✓ Epoxy coatings and special linings for industrial and marine environments.
- ✓ Chemical cleaning and anti-corrosion passivation of piping and equipment.

Industrial Electrical.

We partner with ABB's representative company in Venezuela.

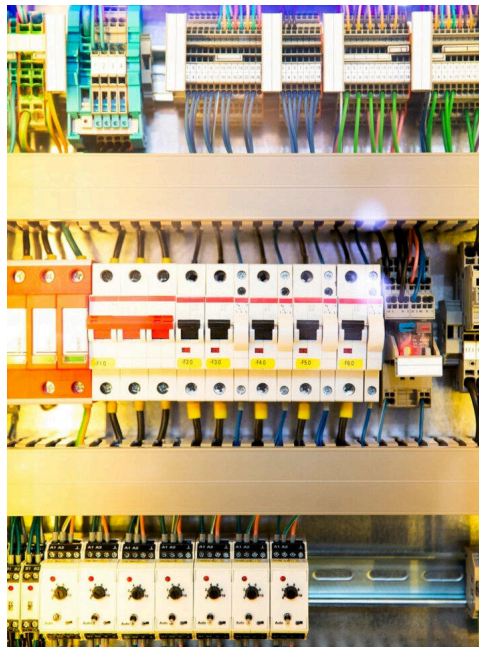

Electrical Equipment Supply

- ✓ Transformers, switchboards, switchgear and MCCs.
- ✓ Medium- and low-voltage cables and raceways.
- ✓ Industrial luminaires and LED lighting.
- ✓ Protection devices, breakers and drives.

Industrial Electrical Works

- ✓ Generation and distribution system installation.
- ✓ Cabling, raceways and grounding.
- ✓ Industrial process instrumentation and control.
- ✓ Preventive and corrective electrical maintenance.

OHSE Policy

INNOVEN C.A. maintains a firm commitment to the occupational safety, health and hygiene of its workers and to the protection of the environment in all its operations. We systematically identify, assess and control operational risks, applying preventive measures that protect the integrity of our personnel, our clients' facilities and the environment in which we operate.

We foster a preventive culture based on equality, respect and environmental responsibility, ensuring safe and healthy working conditions in every project we execute.

CONTRACTS

CONTRACT No. 4900032698 – MAINTENANCE AND REPAIR OF LIEBERT AIR
CONDITIONING UNITS AT THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

CONTRACT No. 4900000327 – MAINTENANCE AND REPAIR OF LIEBERT AIR
CONDITIONING UNITS AT THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

Scope: All activities inherent to the maintenance and repair service of the Liebert precision air conditioning units located in the plants, AIT area, Central Laboratory and the control rooms of Olefins II, Olefins I, PVC II and NGL, in order to guarantee the supply of cool air to these facilities.

CONTRACT No. 4900000096 – SUPPLY AND INSTALLATION OF SCAFFOLDING IN THE
DIFFERENT AREAS AND PLANTS OF THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

CONTRACT No. 4900000495 – SUPPLY AND INSTALLATION OF SCAFFOLDING IN THE
DIFFERENT AREAS AND PLANTS OF THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

Scope: Erection, dismantling and rental of scaffolding to carry out maintenance work in the different areas and plants of the Ana María Campos Petrochemical Complex.

CONTRACTS

CONTRACT No. 4900000352

MAINTENANCE OF CENTRAL AIR CONDITIONING AND COLD ROOMS AT THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

CONTRACT No. 4900000327 – MAINTENANCE AND REPAIR OF LIEBERT AIR CONDITIONING UNITS AT THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

Scope: Maintenance of the central air conditioning units located at PEQUIVEN facilities, including the Ana María Campos Petrochemical Complex, El Milagro Pier, the R.A.S. Plant and any other site PEQUIVEN deems appropriate, in order to guarantee, through applied maintenance, the availability and reliability of all refrigeration systems (air conditioning units and cold rooms) at the Ana María Campos Petrochemical Complex.

CONTRACT No. 4900000395

PLANNED MAINTENANCE OF THE OLEFINS AND GAS PRODUCTION CHAIN AT THE ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

The planned maintenance of the olefins and gas production chain must be carried out under strict quality and safety standards in order to preserve the physical integrity of the personnel involved and of the surrounding equipment. The maintenance activities within this scope are grouped into main work packages:

- Anti-corrosion maintenance and painting of piping, equipment and structures
- Replacement of piping, fittings and steel structures
- Maintenance activities inherent to the static equipment, major rotating equipment, instrumentation, mechanical and electrical disciplines.

- Minor civil works.
 - Supply of equipment and tools
 - Waste management
 - Corrective maintenance of electrical installations.
 - Supply, erection, rental and dismantling of scaffolding
 - Electric motor service
 - Electric motor rewinding
 - Reimbursable costs.
 - Urgency management
 - Emergency management
-

CONTRACT No. 4600139706

UPGRADE OF FUEL DISPATCH AND RECEPTION AT SIMÓN BOLÍVAR PIER

Scope: Keep the facilities in compliance with PDVSA standards and the Organic Law on Prevention, Conditions and Work Environment, while guaranteeing a reliable supply of marine fuel at the Simón Bolívar Pier.

CONTRACT No. 4600143118

UPGRADE SERVICE OF THE QUALITY-OF-LIFE MODULES OF THE LAKE DIVISION

Scope: Execution of civil, mechanical, electrical and instrumentation works for the Rehabilitation of the Quality-of-Life Modules of the Lake Division, specifically at the U.P. Centro Sur Lago, U.P. Lago Medio and PYLO Lake Division management units, progressively supporting the recovery of production and ensuring optimal conditions for each unit and for every process associated with crude oil production in a more efficient and reliable way.

CONTRACTS

CONTRACT No. 4600144098

INTERNAL CLEANING AND MAINTENANCE OF TANKS TK-01 AND TK-02 AT THE SAN LORENZO DISTRIBUTION PLANT

Scope: Disconnection of the tanks' inlet and outlet piping; internal cleaning with brushes, squeegees and pressurized water jets; sludge extraction with a vacuum truck; inspection and adjustment of the floating roof elastomers and bolting; technical inspection of floor and walls; and tank measurement and calibration, including labor, ice, water, equipment, tools, machinery and temporary facilities for the proper execution of the activities.

PROCEDURE No. A-145-23-0013

GENERAL MAINTENANCE OF THE OPERATIONAL AREAS OF THE BAJO GRANDE DISTRIBUTION PLANT

Scope: Comprehensive maintenance of the white-products loading rack: service to the Scully grounding system and fabrication and installation of safety devices for the loading-island preamplifiers; maintenance of flow computers, 4" flow control valves, 3" turbine meters, prover and master meter, loading arms and vapor recovery system; fabrication and installation of spools and pipe fittings; cleaning, anti-corrosion primer and enamel paint on steel structures and piping; traffic paint on curbs and pavements; and civil works including reinforced concrete, rebar, demolition, excavation and compacted backfill.

CONTRACTS

CONTRACT No. 6600002053

MODERNIZATION OF THE LIGHTING SYSTEM, ACCESS CONTROL AND MINOR WORKS AT THE LA SALINA SHIPPING TERMINAL – WESTERN OPERATIONAL COORDINATION MANAGEMENT

Scope: Supply, transport and installation of 10 m hexagonal lighting poles and stand-alone solar-powered LED luminaires, in standard and explosion-proof versions for hazardous areas; removal of existing luminaires and refurbishment of pole concrete bases; supply and installation of an electric motor to open and close the sliding gate; and functional testing and field fault simulation of the lighting and access control system.

CONTRACT No. 4600143118

UPGRADE SERVICE OF THE QUALITY-OF-LIFE MODULES OF THE LAKE DIVISION

Scope: Rehabilitation of the low-voltage electrical installations of the personnel lodging areas: removal and recovery of existing cabling, raceways, devices and luminaires; galvanized steel ladder-type cable trays; 10 kA SCCR molded-case thermomagnetic breakers, 120/220 V, from 15 to 100 A; receptacles and switches; T8 luminaires and LED downlights; emergency lights and illuminated signage; maintenance and cleaning of electrical panels; 4-zone modular fire alarm control panels, 120 VAC, with audiovisual alarms; 5 TR horizontal and 12,000 and 18,000 BTU window air conditioners; 220 VAC industrial electric ranges, ovens, fryers and exhaust hoods; and diagnosis and repair of the existing electrical system.

CONTRACTS

CONTRACT No. 4600139706

UPGRADE OF FUEL DISPATCH AND RECEPTION AT SIMÓN BOLÍVAR PIER – CHANGE
ORDER No. 1, SCOPE CHANGE

Scope: Electrical scope: supply and installation of an electrical panel, 110 V and 220 V receptacles, 10 AWG wiring in PVC and 3/4" conduit for outdoor lighting; 1.20 x 0.60 m LED fixtures, indoor luminaires and outdoor floodlights; video surveillance system with PTZ dome and bullet cameras and recording system; cable identification, disconnection and reconnection, and relocation of electrical and communication boxes; and 12,000 and 18,000 BTU/h console air conditioners with exhaust fans.

PEQUIVEN – ANA MARÍA CAMPOS PETROCHEMICAL COMPLEX

PLANNED MAINTENANCE OF THE INDUSTRIAL SERVICES PLANTS OF THE ANA MARÍA
CAMPOS PETROCHEMICAL COMPLEX

Scope: Electrical scope: electrical and instrumentation maintenance on site, in day, night and holiday shifts; corrective maintenance of electrical installations, including disconnection, removal, installation and connection of #18 to #1/0 AWG cabling in conduit systems from 1/2" to over 2" with their electrical boxes; replacement and refurbishment of lighting fixtures in plant and office areas; service of AC electric motors from 5 to 350 HP and 125 VDC DC motors up to 75 HP; and stator and rotor rewinding of AC and DC motors.

CONTRACTS

EHCOPEK, S.A.

LOW-VOLTAGE INDUSTRIAL ELECTRICAL WORKS – AEM-16 BARGE

Scope: Maintenance and upgrade of distribution and control panels and power and lighting circuits of the AEM-16 barge, with insulation and continuity testing to ensure the operability and safety of its electrical systems.

CEMENTOS CATATUMBO

INSTALLATION OF MEDIUM- AND LOW-VOLTAGE ELECTRICAL PANELS AT THE PLANT

Scope: Installation of medium-voltage switchgear and low-voltage distribution panels, laying of power and control cabling on cable trays, termination, testing and commissioning.

PDVSA PETROPERIJÁ

PREVENTIVE AND CORRECTIVE MAINTENANCE SERVICE FOR THE AIR CONDITIONING UNITS OF THE PETROPERIJÁ ADMINISTRATIVE HEADQUARTERS

Scope: Electrical scope: preventive maintenance of 72 units and corrective maintenance of their power and control systems: 3x100 A three-phase and 3x60 A three-pole breakers, 120/240 V; 20 to 60 A three-phase contactors with 24 V coil; 220/24 VAC control transformers; three-phase voltage protectors, timer relays, 220-24 V fan relays, high/low pressure switches and capacitors; and replacement of 5 TR three-phase hermetic compressors, fan motors and blowers.
